### PROFILE

Experienced Shopify Full Stack Developer skilled in MERN stack, specializing in custom theme, app, and headless eCommerce development for high-performance online stores.

### SKILLS

- ❖ HTML, CSS, Javascript, Liquid , React js , Next Js , Remix Js , Shopify Hydrogen
- ❖ Storefront API, Admin API, Polaris, and Shopify App Bridge
- ❖ Node js , Express js , Mongo DB , Firebase , Rest api , GraphQL api

### EDUCATION

- ❖ Bachelor in Computer Science & Engineering (CSE)

### EXPERIENCE

- ❖ Freelance / Remote | 2022 – Present

### PROJECTS

- ❖ **Custom Add-on Integration for Shopify Theme (RebornRustic.com)**  
Developed a fully customized Shopify theme enhancement for *RebornRustic.com*. The client wanted customers to add paid add-ons to products beyond Shopify's default functionality. Built a custom app (no public app used) that dynamically adds add-on prices to the checkout through a secure server API call, since Shopify by default doesn't support non-hosted price injections. Also implemented a wishlist system using localStorage to persist user preferences without a backend.
- ❖ **Real-Time POS & Shopify Sync App (Custom App Development)**  
Built a custom integration app to synchronize data between LightSpeed Retail POS and a Shopify headless storefront. The app fetches real-time product and order updates — automatically pushing data between the POS and Shopify using Admin API and webhooks. Developed both the custom app backend and headless frontend to ensure smooth inventory and order management in real time.

### ACHIEVEMENTS / HOBBIES

- ❖ Learning new web technologies
